

Let's Find the Big Trees of Shinjuku Gyoen!

Shinjuku Gyoen is home to many very tall trees. Some were planted over 100 years ago and are taller than 10-story buildings! This sheet features an impressive tree of each species found in the garden. What are their names? Where can you find them? Take a look at the map and go see them for yourself!

35
m

2 Bald cypress

It's sprouting respiratory roots from the ground, so take a look!

36m

3 Tulip tree

Pretty tulip-like flowers bloom around May.

22m

4 Japanese elm

It's a common tree in Hokkaido but rare in Tokyo.

47m

5 London plane

It's in an unnoticeable spot, but it's actually the tallest tree in the park.

28m

1 Maidenhair tree

It is fire-resistant and prevents the spread of fire, so it is popular as a street tree.

36m

6 Deodar cedar

It's called cedar, but it's actually a member of the pine tree family, and it makes big pine cones.
